Approximately 27 million working days were lost due to work-related illness or workplace injury during 2012. Some of these are injuries and illnesses that can be easily avoided.

This short, auto-marked programme will give you the knowledge you need to understand those risks and how to control and act upon any likely hazards.

A great addition to your CV to show your commitment to health and safety at work, this programme is also beneficial for general knowledge.

Completed online with auto-marked assessments, this programme can be completed in your own time.

- Place of study: **Learn from home**
- Type of course: **Online distance learning course with no exams**
- Course duration: **An average of 2 hours.**

Full tutor and customer service support will be provided throughout the course.

Section 1: Roles and responsibilities for health, safety and welfare at work

In this section, your learners will develop their understanding of employers' and employees' duties relating to health, safety and welfare. They will cover the requirements for training and competence in the workplace and how to effectively communicate health and safety information.

Section 2: How risk assessments contribute to health and safety

Your learners will cover the meaning of the terms 'hazard' and 'risk', how risk assessments are carried out and how they contribute to a reduction in workplace accidents and ill health.

Section 3: Identifying and controlling risks from common workplace hazards

This module will enable your learners to identify hazards in the workplace, understand how hazards can cause harm or damage and learn the risk controls for common hazards.

Section 4: Procedures for responding to accidents and incidents at work

In this section, your learners will cover the common causes of workplace accidents and ill health, the actions to take following an incident at work and the importance of recording incidents, accidents and ill health accurately.
